### Daz3d - Poser - Leyton Hair For Genesis 2 Female

I am a huge fan of classic artists like Salvador Dali, Calder and Leonardo da Vinci, but am also strongly influenced and inspired by the works of contemporaries like Jack Pridota, David Ho, Luis Royo, Olivia and many of my fellow Renderosity artists who continue to inspire me on a daily basis. I have several college degrees including a BA in English Writing, a BA in Anthropology, and an MS in Evolutionary Ecology (a subdiscipline of Anthropology). I went home that day and created some silly little piece and after that I was totally hooked. I think my ultimate goal with my graphics - what I really hope to get out of all of this - is to create something truly beautiful one day that either someone will deeply appreciate in their heart or that will inspire someone to create something beautiful. Thanks for stopping by And happy rendering!V. Leyton Hair for Genesis 3 Female My name is Victoria, and I was born and raised in Los Angeles, California (but live elsewhere now). Dazposer NET shares 3D contents for daz3d studio and poser You also get 3dsmax, maya, corel, photoshop and vector templates. I first became interested in computer graphics some time circa 1995 when my dad gave me this CD package of some new, up-and-coming computer software at the time which included Aldus Photosetter and KAI PowerTools.

Now I'm equally obsessed (if not more so) with all things 3D as well My art is a mixture of DAZ Studio, Poser, Photoshop CS5 and Filter Forge. My other tools of the trade include Hexagon, Silo, ZBrush and Vae, and I also do black & white digital photography and photo restoration on the side. Since then I have been teaching myself all things Photoshop About two years ago I came across an ad in a magazine for DAZ Studio. A few years later a friend introduced me to Photoshop, and it was love at first sight. I had always been a little intimidated by 3D graphics, thinking it was way too hard to do, but I decided to give it a shot anyways.
